## SL Rack Alpha plate: Everything thought of!

- **Universal roof replacement panel for any type of tile and any roof pitch**
- **No mechanical cutting of tiles necessary**
- **Sealed with a riveted rubber sleeve, made of UV-resistant EPDM. The sides of the panel are raised at the edge to ensure water-tightness**
- **Wind calmed zones are created in the corrugated depressions; this allows the water to flow straight downwards**
- **Bracket is suitable for normal and very high snow loads of up to 1500 kg**
- **Available in brick red (similar to RAL 8004) and anthracite (similar to RAL 7016)**
- Horizontal and vertical attachment of the module carrier profiles
- With integrated snow and ice deflector
- Can replace up to two roof tiles
- Made of rolled aluminium sheet
- Quick and easy installation
